

## Share to Win

### Share What?

Share information and assets of national and NATO networks and infrastructure. Share capabilities and best practices.

### Win What?

Better shared information leads to better situational awareness which leads to decision superiority. and supports the agility of NATO forces thus gaining an advantage over the opponent.

Share to Win is not an elective statement, but a requirement to move forward to achieve our desired goals and outcomes. Share to Win is not just a slogan; it is a change in philosophy and business practices to achieve our common goal and outcomes. NNEC provides people the capability to share more effectively and efficiently.

## Tools and Resources

NNEC is beyond theory as it is being implemented in many of our new projects. NNEC enables core capabilities in many current and new projects and programs. Additional information to help you fully integrate NNEC into your next project or program is available, including:

- NNEC Feasibility Study
- NNEC Vision and Concept
- Management Approach to NNEC
- NNEC Roadmap\*
- NNEC Models and Maturity Levels\*
- Criteria for NNEC Compliant Systems (NNEC Criteria) \*
- NNEC Services Generated Architecture\*

\*Document under development

## NATO Network Enabled Capability

General  
Overview

NATO Network Enabled Capability (NNEC) is the Alliance's ability to federate various capabilities at all levels, military (strategic to tactical) and civilian, through an information infrastructure. This federation of our nations' and NATO assets will provide enhanced dissemination of information to complete any NATO mission or task more efficiently.

## Benefits of NNEC

NNEC is a culture change that begins with the people of NATO. The combined belief in the benefits of NNEC and the willingness to share will lead to long-term, long-lasting benefits. Samples of the benefits we will see are:

- Improved efficiency,
- Better information quality,
- Better understanding of military situations,
- Faster decisions and speed of command,
- Deployment of fewer forces, assets, people while realizing better results,
- and more!

NATO Network Enabled Capability is a top priority of NATO which makes it essential for our nations to work together and to better use today's technology.

NNEC will be a cultural change and a new way of doing business. This change starts with you.

More information and documentation on NNEC can be found on-line at <http://nnecc.act.nato.int>.

## Get CoNNECted

The core of NATO Network Enabled Capability is people. Ensuring the cognitive and human aspect of the program stay in the forefront we will realize the benefits of NNEC; the way you consider information and the way you consider the exchange of information.
